[ISDA-specific agenda 11-17.docx](#)

Hello Brian,

Thank you for getting back with me. I fear I may once again have created more confusion with respect to a site visit. I know you have a number of new inspectors, some who may not be familiar with dairy operations and the associated waste management issues. For that reason, I suggested a "Virtual Dairy Tour" for the 8:30 am time slot. I was hoping that your staff could provide a presentation, using existing photos, that would describe typical dairy operations, including waste management. I figured that would save us a lot of time so we could cover all the other related issues in just one day. If you think that an actual site visit would be more important, we can drop some of the things from the draft agenda I sent you or expand the class to the 1.5 days you originally suggested. I assumed that with the BIT training in October, 1.5 days might be too much. Would you like me to discuss this directly with Mitch?

Thanks,

Pat

**Subject:** RE: Sorry for confusion

Looks like the week of November 6<sup>th</sup> would work best for ISDA for the CAFO specific training. Mitch Vermeer can set up the site visit when we finalize the dates. Let me know. Thanks.

**Subject:** Sorry for confusion

Hello Brian,

I apologize for any confusion about the basic inspector training. I wanted to make sure we were addressing all the topics of interest to ISDA but I think I ended up muddying the water.

The Basic Inspector Training (BIT) is locked in and scheduled for October 17, 18, and 19 (half day on the 19<sup>th</sup>). This class (I think of it as the "Cadillac" of inspector classes) addresses all the issues (preparing for the inspection, conducting the inspection, documentation, etc.) that any inspector needs to know. ISDA's participation in this class, along with IDEQ, was the one of the driving forces that has enabled us to bring this class to Boise. The only thing the BIT class does not have is a CAFO-specific component. Joe Roberto, Nick Peak, and I were concerned that this missing piece meant that we had not completely satisfied our commitment to ISDA. To make up for this, we thought we could follow-up the BIT with a short class targeting the additional, more specific issues, that ISDA might be interested in. I did put together a sample agenda that I planned to run by you for your input (see attached). We were originally thinking about November because we don't know what our travel funding will look like beyond that month. I understand that November may not be the best time you. If you are interested in something like this at a later date (it doesn't have to be a full day), I'm sure we can make something work.

Let me know if you have any questions or comments.
